

Be a force of nature

XXXX

Business Intelligence Administrator

At Arla Foods, our natural passion for new technology plays a vital part in how we strive to grow our business and bring our consumers closer to nature. As the energy of our business, you combine a technical, engineering mindset with quality orientation and a desire to head our continuous evolution. Be a force of nature. Join us at arla.com/career.

Technical administration and configuration of EPM tools

You will be part of the Corporate Finance department in Aarhus, which is responsible for the budget and forecast process in Arla Foods, as well as following up on group economic objectives, in cooperation with the finance function in our different Business Groups. More specifically, you will join the Arla BI Competency Center (BICC), and hereby help the organisation grow and mature in the Business Intelligence area.

The goal of BICC is to develop and grow a management team for Business Intelligence that bridges the gap between Business and IT and exploits the great potential of this in Arla Foods. As BI Administrator, you will be responsible for the technical administration and configuration of EPM tools, incl. SAP BO BFC. This involves setting up new financial consolidation rules, adapting changes related to M&A activities, monitoring and tuning applications, and maintaining security and user settings.

Also, you will manage IT partners and outsourced services, ensure implementation of software upgrades and patches – and finally, you will handle day-to-day incidents and errors.

You will get a unique opportunity to develop not only your knowledge of business processes, but also your skills within BI applications and tools. The position will expand your network, as you will work alongside a broad range of people in our organisation.

Skilled administrator with 1-5 years of experience

You must be a skilled administrator of IT tools within Business Intelligence and analytics. Ideally, you have 1-5 years of experience working with semi-technical tasks within the financial processes in a larger company. Your career has given you knowledge within Cognos or Oracle Performance management tools such as Hyperion or ETL and data integration tools such as Data Stage or BO Data Services. To be successful in this position, you must be capable of understanding how you and your team members deliver fast, accurate, reliable and timely information to the BI stakeholders. The IT disciplines are a crucial part of reaching a suitable service.

You are characterised as a proactive and committed team player, who thrives on driving results in a complex and distributed organisation. Last but not least, you have solid communication skills and excel in both written and spoken English.

Application and contact

Send your application to job@arlafoods.com no later than 1 August and include "1110610" in the subject field. For additional information, please call BI Manager Peter B. Riisberg at +45 8938 1769. Please state in your application where you have seen the advertisement.

At Arla Foods, we turn milk into innovative products and strive to bring consumers around the world closer to nature. We are united and empowered by respect for the natural source that keeps us in business, and we share a determination to continue our ambitious development and growth. It will be a journey of a lifetime and to succeed we work together – to Lead, Sense & Create.
